

## One of our most popular items.

For 50 years, we've made a point of stocking just about everything a practice needs. Over that time, we've learned that if there's one thing our customers love, it's the careful attention of our people. This doesn't surprise us. We try to know your business almost as well as you do. Also, we just hire nice people.

Most of our competitors have grown by merging. We have always preferred the method of superior service. We thank you for your loyalty and we promise to earn it with every call.
